

"Inauguration Good Samaritan Hospital"

Italian Volunteers and community of Tetere invite Prime Minister to inaugurate the new "Good Samaritan Hospital"

After a dream that started 10 years ago during the ashes of the Ethnic Tension, the Tetere communities with the help of the Italian Volunteers A.M.I.S (Amici Missione Isole Solomons) finally inaugurated the new medical Facilities that will serve the north east Guadalcanal Area in their basic health needs.

For long this area has been known to be have the highest number of maternal deaths in Solomon Islands, this trend s will hopefully be inverted and women and children will find a dignifies place to serve their needs.

The Tetere Good Samaritan Hospital took three full years to build with the help of Italian Volunteers who came during the winter season to give their free services after having organized fund raising to solicit the necessary funds to carry on the projects.

These Hospital facilities are more a message of what the good will of private people can do when animated by supernatural or humanitarian reasons. They can achieve what governments cannot... thus proclaiming the power of universal brotherhood and friendship in spite of barriers of language and customs... Italian and Solomon people have worked hard side by side to make this dream come true. To them our sincerest gratitude and admiration.

The challenge is now to keep the facilities in top shape, free from what can degrade them and make them unworthy of the name Hospital. Italian Volunteers will continue to come and support in the up keeping and management of the same facilities. Honiara has Number Nine Bishop Capelli from Gizo mentioned, but we have Number one...and indeed the structure and facilities are meeting international standards.

Women of Guadalcanal have nothing less in dignity than any other women in the world and therefore deserve this V.I.P Treatment...

Thank you to everyone who helped make this dream come true...
More unity and sharing of Italian and Solomon Culture and more projects to us all...

The amis volunteers
